Conduct a literature review to help develop your understanding of the problem, the processes involved, and the potential key drivers. Have other people worked on this issue before? Are there any quality improvement initiatives related to yours that have already been published?

**What Background Questions did you use to drive a review of the literature?**

**What Foreground (PICO) Questions may be helpful to review the literature?**

**What Key Words did you use to review medical databases?**

Cite any articles you find that will help drive your QI Project:
